Re: Langley AFB Repair Hangar 789
HCC Project Number 140021

Dear Jose,

You and your organization at Harbor Construction are to be commended for the expeditious manner with which you managed your subcontract work on this project. The hangar's 25,000 SF administration area was stripped of all lights, electrical devices and all finishes down to the metal studs, then new drywall, electrical devices, ceiling grid and lights, and flooring was installed in less than 60 days total time from award to completion and turnover. Your firm's top notch crew, led by foreman Mike Privigyj, was ahead of the pace and pushing hard from the get go. It is because of those efforts that we successfully met the completion date of October 6, 2014

Harbor Construction's dedication and close coordination with Homeland Contracting Corporation, other subcontractors, and USAF 633rd Civil Engineering is typical of the project focus which clearly sets your firm apart.

Your commitment to quality work, partnering and the development and maintenance of productive, professional relationships will serve your firm well on future projects. Should you ever require a business reference, please feel free to provide my name and phone number to anyone who should ask.

We look forward to our next project with Harbor Construction.

Sincerely Yours,

Homeland Contracting Corporation

Jennifer L. Crain
President
